Who We Are

At **Skillmasters**, we are redefining talent identification through an objective, standardized approach to player evaluation. By moving beyond subjective observation, we provide athletes with a data-driven blueprint of their game - including deep insights into technical strengths, specific areas for growth, and global age-based rankings.

Our platform creates a unified language for development, empowering players, coaches, and families to:

- Monitor Progress: Seamlessly track technical evolution and development over time.
- Target Growth: Gain clarity on exactly which skills require immediate focus.
- Benchmark Excellence: See how a player truly compares within a global pool of peers.

By bridging the gap between raw potential and measurable performance, we ensure that every player knows exactly where they stand and what it takes to get to the next level.

Understanding Your Club Event Results

What is This Report?

The Skillmasters Club Event Results packet summarizes athletic and technical assessment results across the club for this event. It includes club-wide benchmarks, team reports, and player results across Speed, Agility, and Ball Control.

What is a Percentile?

Color	Range	Meaning
Green	75%+	Strong Performance
Yellow	50-75%	Good, Room to Develop
Orange	25-50%	Needs Attention
Red	0-25%	Priority Focus Area

The “Global Rank” on a player’s profile represents a percentile score. It shows the percentage of players in the same age and gender group — across all countries we’ve tested — that they perform better than.

Important note: timed drills work inversely — a lower number of seconds is faster and a better percentile. Don’t be alarmed if a smaller time has a high rank.

Understanding Your Club Event Results

What Do We Measure?

Metric	Assessment	Description
Zigzag ZZ	Zigzag	Measures change of direction without the ball. Key for defending, pressing, and quick movement in tight spaces.
Arrowhead Ah	Arrowhead	Measures multi-directional speed and body control. Reflects how well a player moves through sharper, game-like angles.
Arrowhead Dribbling AhD	Arrowhead Dribbling	Measures ball control through open-field direction changes. Shows how well a player carries the ball at speed through dynamic movement.
Open Field Differential OFD	Arrowhead Dribbling	Compares dribbling vs. non-dribbling arrowhead speed. Shows how much speed is retained when carrying the ball in open space.
Passing Pass	Passing	Measures speed and control when receiving and distributing. Highlights first touch, accuracy, and rhythm in possession.
Broad Jump BJmp	Broad Jump	Measures lower-body explosive power. Impacts sprinting, jumping, and overall athletic performance.
Zigzag Dribbling ZZD	Zigzag Dribbling	Measures directional speed while controlling the ball. Combines agility with technical dribbling ability.
Small Space Differential SSD	Zigzag Dribbling	Compares dribbling vs. non-dribbling zigzag speed. Shows how much speed is retained when dribbling in tight spaces.
20 Meter 20M	Sprint 20m	Measures top-end sprint speed over 20 meters. Important for breakaways, recovery runs, and winning foot races.
10 Meter 10M	Sprint 20m	Measures acceleration over the first 10 meters. Shows how quickly a player can explode and create separation.
Peak Velocity PV	Sprint 20m	Captures maximum sprinting speed. Reflects top-end pace in open-field situations.
